

# TOP THREE STRAWBERRY DISEASES

While controlled environments offer many advantages for indoor strawberries, they also create the perfect conditions for certain plant pathogens to thrive.

Deep and constant monitoring of your system is the best way to stop the disease before it's too late!

## NEOPESTALOTIOPSIS

Neopestalotiopsis (aka Neo-P) infections show characteristic reddening of leaves, wilt, and rots.

## BOTRYTIS

Also known as Gray Mold. On strawberries, it typically manifests as a soft rot on ripening fruits.

## PHYTOPHTHORA

Phytophthora spp. are soil-borne pathogens that causes leather rot (and other rots) in strawberries.

# BENEFITS OF MONITORING

## Early Detection

Protect your crops from hidden threats with proactive testing. Detect issues early, prevent losses, and ensure a healthier, more resilient yield.

## Accuracy to the Dot

We detect what others miss. Our advanced diagnostics ensure early threat detection, protecting your crops with unmatched precision.

# HOW IT WORKS

## Send Us the Sample

For guidance on sample preparation and submission, contact Jason or your dedicated SGS representative to ensure accurate and reliable results.

## Lab Work and Processing

Our molecular bio experts ensure precise and reliable processing of your samples for accurate diagnostic results.

"Neopestalotiopsis, a re-emerging strawberry pathogen, demands vigilant early monitoring to prevent catastrophic losses in indoor crops."

- Greenhouse Operator

# START YOUR MICROBIAL JOURNEY WITH US

## PATHOGEN MINI

- Targets **Botrytis** or **Phytophthora**, and more!
- **Neopestalotiopsis** is under development.
- 2-3 days turnaround time.

If you are not sure of what to use, we will help recommend the test for you. 

## PATHOGEN+

- Advanced pathogen identification and monitoring.
- **Detects 600+** pathogens in one sample: Bacteria, Fungi, Algae, Water molds, Human Pathogens, and more.
- Includes access to Qlab Results, an easy-to-use portal to access reports.

Ensure your production's success with proactive testing and expert support. Reach out to us today to learn more.
